

CHAPTER 1: INTRODUCTION

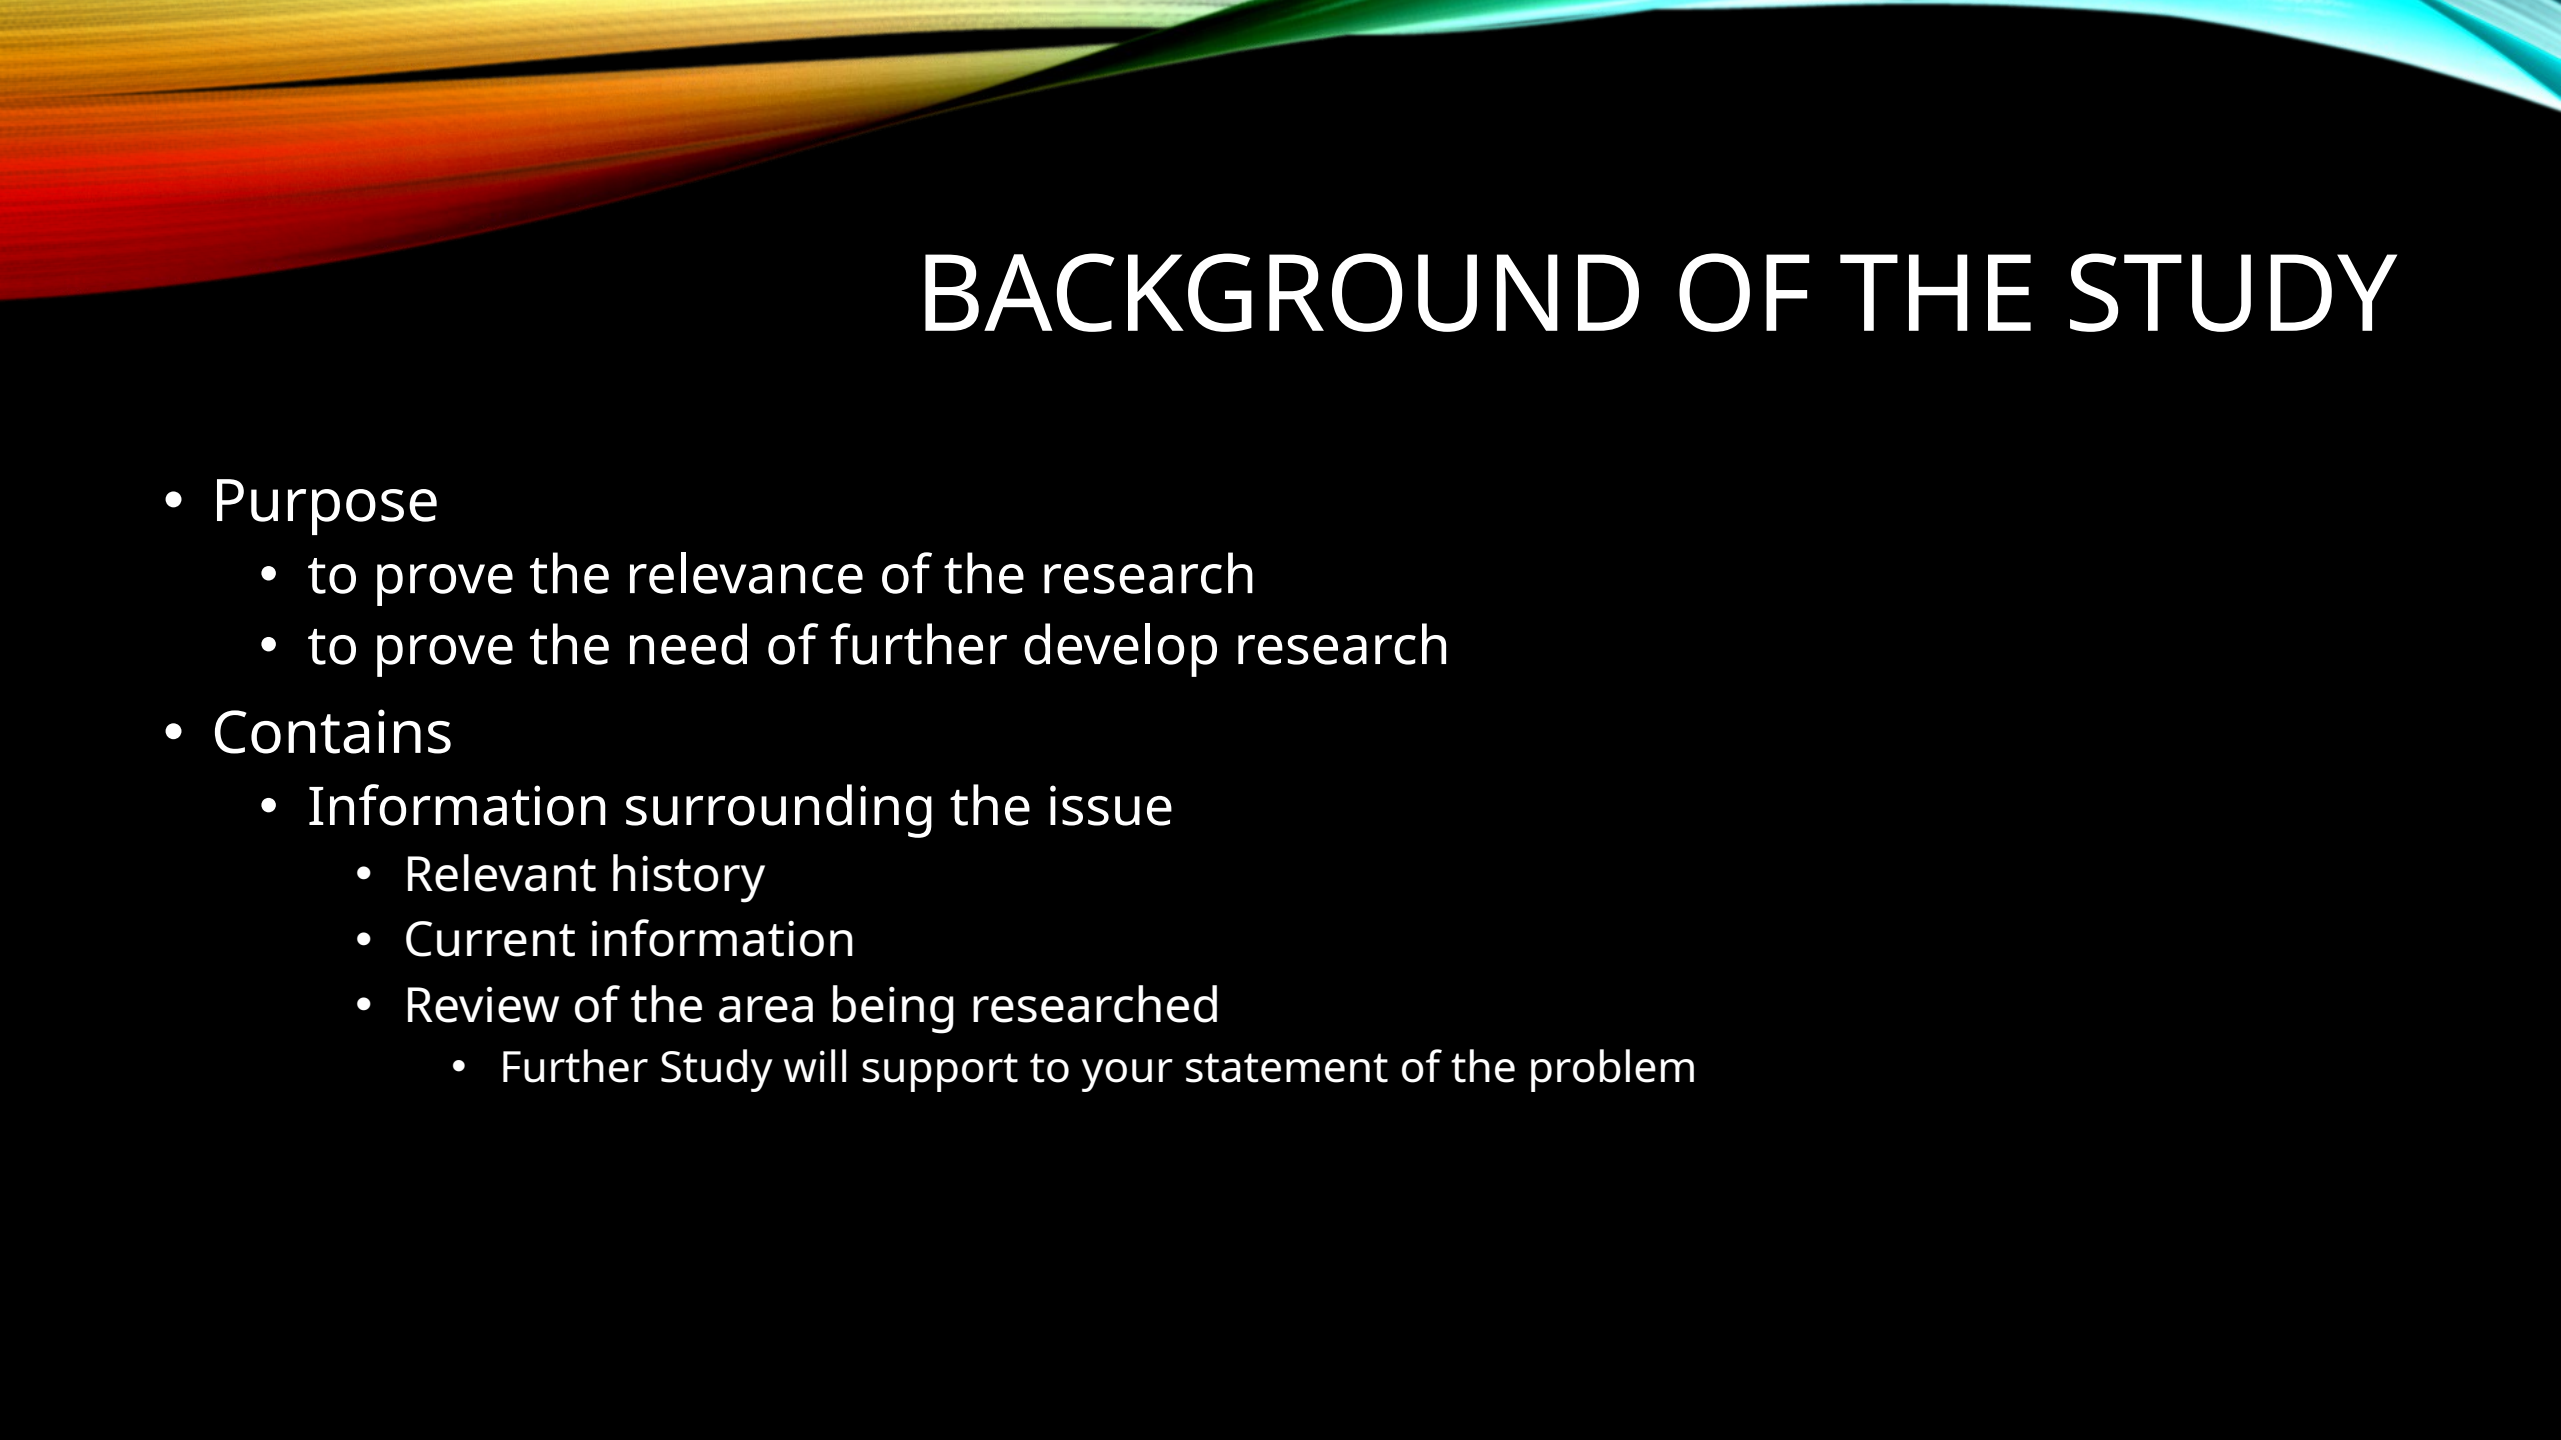

PURPOSE OF INTRODUCTION

- Background information about the topic
- General research issue or problem to your specific area of research

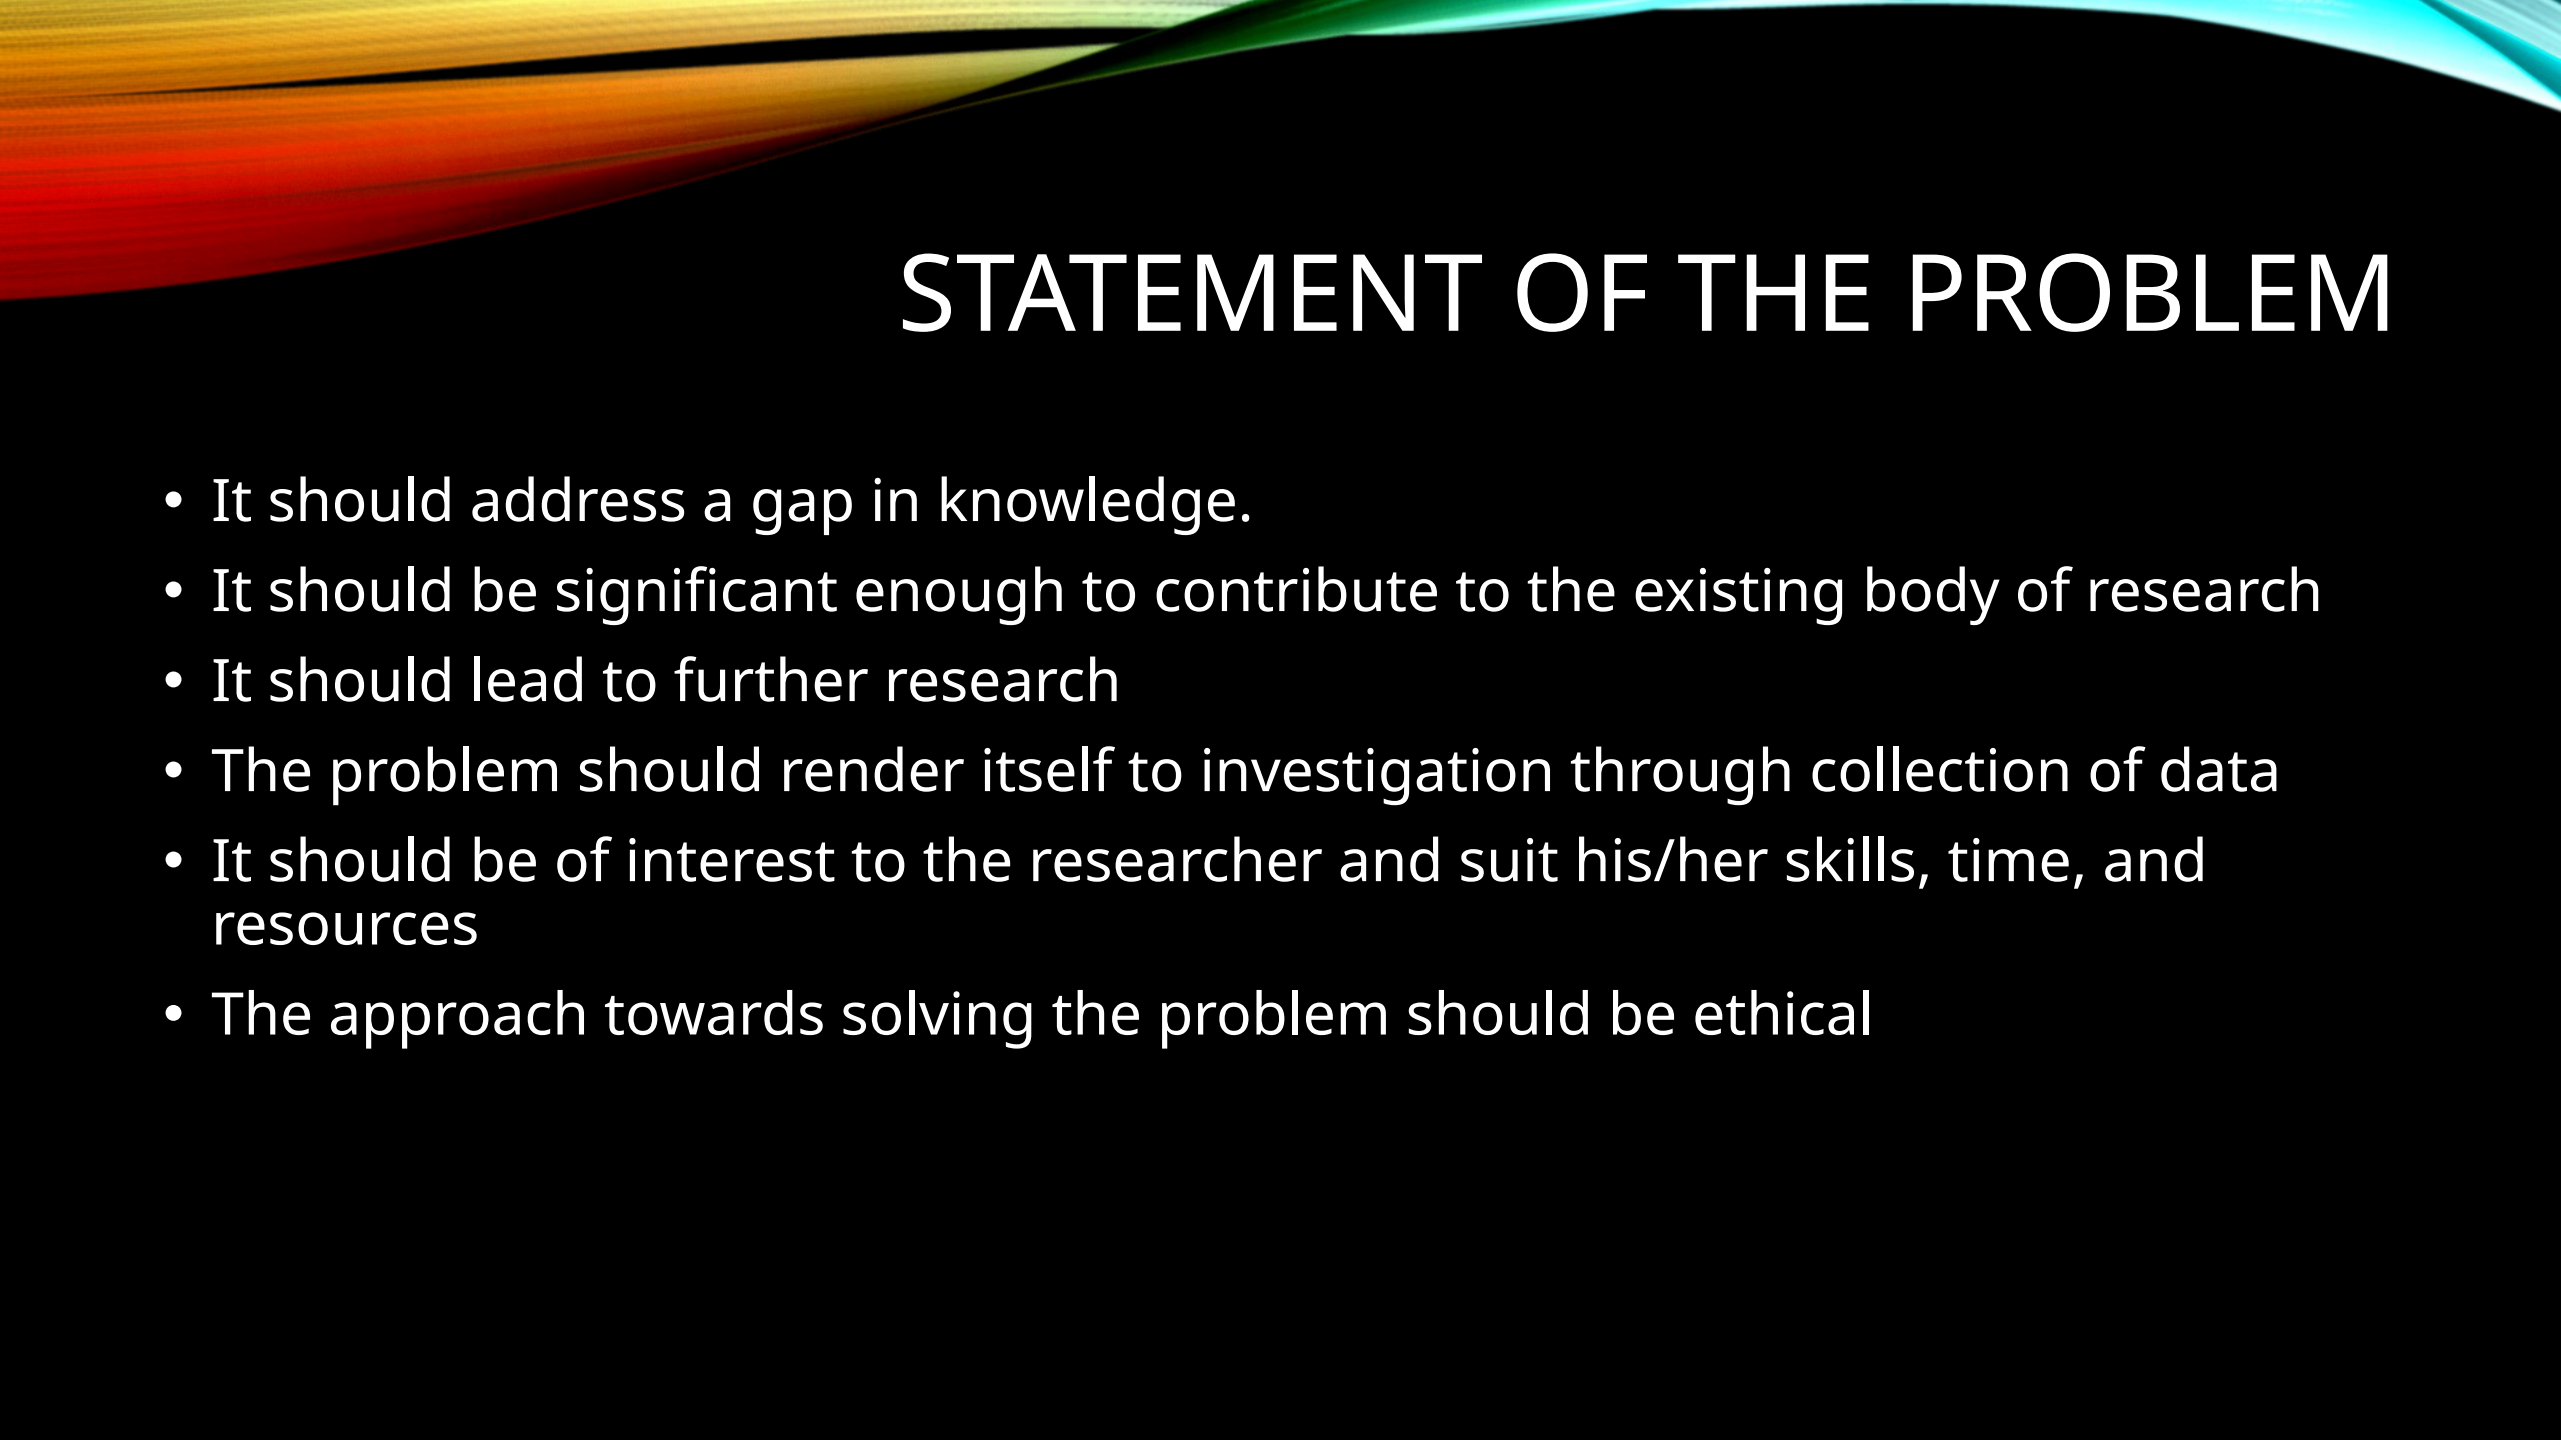

PARTS

- Background of the study
- Statement of the Problem
- Objectives
- Significance of the Problem
- Scope and limitations of the study

BACKGROUND OF THE STUDY

- Purpose
 - to prove the relevance of the research
 - to prove the need of further develop research
- Contains
 - Information surrounding the issue
 - Relevant history
 - Current information
 - Review of the area being researched
 - Further Study will support to your statement of the problem

STATEMENT OF THE PROBLEM

- It should address a gap in knowledge.
- It should be significant enough to contribute to the existing body of research
- It should lead to further research
- The problem should render itself to investigation through collection of data
- It should be of interest to the researcher and suit his/her skills, time, and resources
- The approach towards solving the problem should be ethical

STATEMENT OF THE PROBLEM

- explicitly states the problem to be solved in the course of the research work;
- should include all parameters to be considered in the course of the project;
- may be one or more sentences;
- may come in question form.
- may be broken down into general and specific problem.

OBJECTIVE/S

- **General Objective**
 - states what you expect to achieve in general terms
- **Specific objectives**
 - general objective into smaller, logically connected parts that systematically address the various aspects of the problem.
 - Your specific objectives should specify exactly what you will do in each
 - phase of your study,
 - how,
 - where,
 - when and
 - for what purpose.

OBJECTIVE/S

- Sample
- "...this project proposes the use of optimization methods for vehicle route problems..."
- "...the main objective is to develop neural network algorithms for sentiment analysis in text..."
 - It is hard to grasp the actual problem to be addressed
 - It is not clear what exactly is the research question and its importance in those objectives

SIGNIFICANCE OF THE PROBLEM/RESEARCH

- states why the problem needs to be solved;
- answers who will benefit from the study and
- what benefits will be derived by the beneficiaries.

SCOPE AND LIMITATIONS OF THE STUDY

- **Scope**
 - is the breadth,
 - depth or reach of a subject;
 - a domain
 - Should include
 - General purpose
 - Subject matter
 - Topics studied
 - Population or sample
 - Area or locality
 - Time or duration

SCOPE AND LIMITATIONS OF THE STUDY

- **Scope**

- is the breadth,
- depth or reach of a subject;
- a domain
- General purpose
- Subject matter
- Topics studied
- Population or sample
- Area or locality
- Time or duration

- **Limitation**

- is the act of **limiting** or
 - the state of being limited
